Curing Light

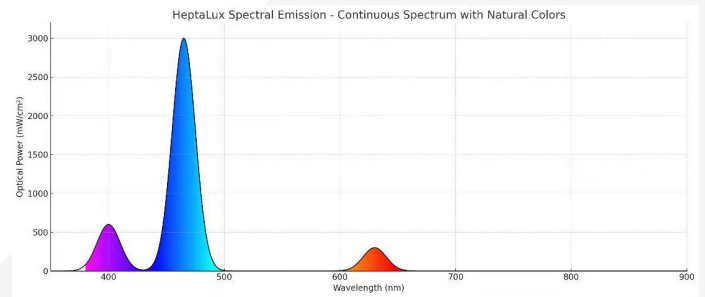

hello

www.xpedent.com

Pink Hyperspectral LED

- Reduce resin shrinkage, lower the risk of microleakage and secondary caries, and alleviate post-operative sensitivity for patients.
- Enhances the degree of polymerisation, making restorations harder and more wear-resistant.
- Features powerful penetration capabilities; curing depth of up to 8.6 mm.

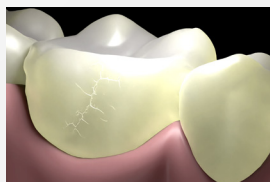

8 modes create clinical flexibility

- Normal Mode
- High Mode
- Super Mode
- Ortho Mode
- Soft Mode
- Pulse Mode
- Check Mode
- Transill Mode
- User memory

Check Mode

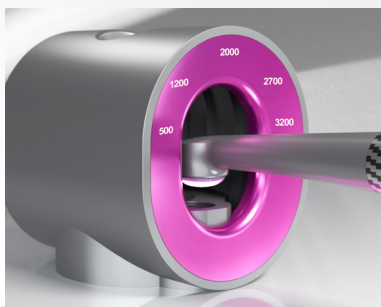

Transill Mode

The maximum light intensity reaches 3200mW/cm²

Light intensity measurement

360° rotating head

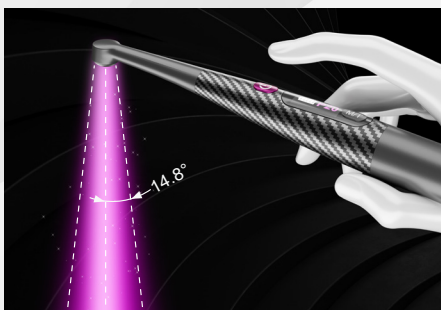

*HeptaLux
11° Illumination angle*

*Ordinary light guide rod
> 40° Illumination angle*

14.5° precise light angle

Clear OLED display Wireless charger
